

HNE PH Plus - Digital Electric Panel Heater

HNE PH Plus Digital Electric panel heaters combine the latest technologies and a traditional heater to create an efficient, modern and controllable direct heating solution. They are the perfect solution for a space saving, cost effective and rapid solution to heating a room for shorter periods of time, quickly reaching the desired temperature.

The HNE PH Plus range are controlled via the built-in digital thermostat that boasts an industry leading accuracy of $\pm 0.1^{\circ}\text{C}$. Equipped with efficiency features such as daily and weekly digital programmer, highly accurate thermostat, three temperature modes, open window detection for reduced energy waste, adaptive start control to guarantee maximum comfort at the desired time and a 5 year back-up security system.

HNE PH Plus - Digital Electric Panel Heater

Technical Features

- Electronic Triac control optimizer ETCO.
- Digital display for Clock, Selected temperature.
- Daily and weekly programmer.
- Three-level mode temperature selector: Comfort, Economy and Frost-protection.
- Open window detection for reduced energy waste.
- Adaptive start control.
- Built-in electronic ambient thermostat $\pm 0,10$ C.
